

Water for today, tomorrow and your future

With a Rota tank you can be rest assured that you will have access to water when you need it. There are many benefits of getting a Rota tank.

Tough, durable and dependable

Rota tanks are the only tanks in Fiji that are certified to the **AS/NZS 4766-2006** standard (for polyethylene water tanks) and are manufactured under the world renowned **ISO 9001-2008** Quality Management System.

Our tanks have a **UV24 rating** (exceptional protection in the sun) which **prevents algae growth** in your water.

Rota tanks **will not rust** and come with a **20 year warranty**.

Water you can drink

Rota tanks are made from **non-toxic, food grade** polyethylene making the water in it safe to drink. All our tanks have a strainer under the lid to prevent dirt and insects falling in.

Our tanks are **BPA free** and **do not leach** any chemicals.

An easy choice

Rota tanks are available in a **range of sizes** to suit your individual needs. See overleaf for tank sizes and specifications.

Rota tanks are **easy to transport, install** and are **maintenance free**.

Get your genuine Rota tank today

Call – 666 1213 or 336 1701 or 799 0930

Also available at all major hardware outlets in Fiji

We deliver free of charge if you are located within 1 km off the King's and Queen's highway. Deliveries outside these boundaries incur a charge – we will advise you of this amount at the point of sale.

Rota tanks are also available around the Pacific in Samoa, Tonga, Kiribati, Vanuatu, Solomon Islands and in East Timor.

Sizes and dimensions of our tanks

Tank Capacity		Height	Diameter	Weight
Litres	Gallons	(mm)	(mm)	(Kg)
300	66	920	660	9
500	111	1065	850	16
1000	222	1430	1050	30
2000	444	1660	1370	45
3100	689	1640	1710	60
5300	1178	2480	1800	100
10200	2267	2550	2450	200
25000	5555	2900	3525	375

How Rota tanks are made

Leading technology

World-class technology is used in the rotational moulding process to manufacture Rota tanks.

We use polyethylene, which is an extremely tough, lightweight and durable thermoplastic material. The colour and ultra-violet stabilizers are compounded to give long-term resistance and stability in harsh sun.

No chemical reaction takes place during the manufacturing process of tanks so there are no chemical residues or by-products in Rota tanks to taint your water.

Tank construction standards

Rota tanks are constructed from quality materials that meet the highest standards.

Machine controlled rotational one-piece moulding is used to achieve a stress free state in our tanks. Type test results concluded that Rota tanks would not fail during a normal 20 year service life and would be capable of withstanding ambient air temperatures up to 40°C.

Exceptional quality

Rota tanks are compliant with ISO Type 5 certificate of conformity and is evaluated to the AS/NZS 4766-2006 standard for polyethylene storage tanks for water and chemicals.

They are manufactured under the world renown ISO 9001-2008 Quality Management System - the only water tanks in Fiji to be given this certification.
